

Design a Unique ID generator.

↳ At Scale.

⇒ Auto Increment Ids.

⇒ Sparse

Id's: 1, 2, 3, 4, 5, 6, ... } Dense

Youtube: [youtube.com/videos/ax4249zmjNAX](https://www.youtube.com/videos/ax4249zmjNAX)

Amazon Pay Voucher. \Rightarrow xxxx - xxxx -

Aadhar Card : - - - - -

aadhar.gov.in | details | 1234-5678-1234

↑
[0-9] = 10 possibilities.

Unique aadhar No's possible = 10^{12}

No. of users / Population = 1.5B
 $\approx 1.5 \times 10^9$

$$= \frac{1.5 \times 10^9}{10^{12} \cdot 10^3}$$

$$= \frac{1.5}{10^3} \times 100 \%$$

$$= \frac{1.5}{10} = \underline{\underline{0.15\%}}$$

ID generation can happen on client or backend
Side.

Server Side ID generation

I) ID should be unique across multiple servers.

II) ID's should be sparse.

III) ID's should be incremental.

$$\text{if } t2 > t1 \Rightarrow id2 > \underline{\underline{id1}}$$

VOID.

↳ 128 bit Numbers.

$$\Rightarrow (2^{128})$$

$$\frac{128}{4} = (32)$$

4 bits : 0-15
↓
0000 to 1111

Hexadecimal.

0 }
⋮ }
9 } ✓
10 A
11 B
12 C
13 D
14 E
15 F
=

5C3A - [] → []

#

timestamp + device-id → Client info

→ Extra N/w hop → Slow.

→ Bottleneck.

Twitter's Snowflake Algorithm.

↳ 2010.

⇒ 64 bits.

timestamp ⇒ epoch time

how many milliseconds have passed
after the cut off date.

01-01-1970.

Twitter

⇒ 4th Nov, 2010.

$$41 \text{ bits} \Rightarrow 2^{41}$$

$$\Rightarrow 21\,99\,0232\,55552 \text{ ms.}$$

$$\Rightarrow \frac{21\,99\,0232\,55552}{1000} \text{ sec}$$

$$\Rightarrow \frac{21\,99\,0232\,55552}{1000 \times 60 \times 60 \times 24 \times 365} \text{ years.}$$

$\approx 70 \text{ years.}$

5 Bits \Rightarrow Datacenter id.

$\rightarrow 0-31 \Rightarrow 32 \text{ nos.}$

$\rightarrow 32 \text{ Datacenters.}$

5 Bits \Rightarrow m/c id.

$\rightarrow 0-31 \Rightarrow 32 \text{ nos.}$

$\rightarrow 32 \text{ m/c per datacenter.}$

Max no. of m/c = $32 \times 32 = 2^{10}$
= 1024.

12 Bit : Sequence No.

Race Condition

12 Bits.

$$\rightarrow 2^{12} =$$

4096.

get reinitialized
after every ms.

$$1 \text{ ms} \Rightarrow 4000$$

$$1 \text{ sec} \Rightarrow 4 \times 10^6$$
